

What's new in MachiningCloud v2.3

The MachiningCloud App has been updated with the following improvements:

- Command, Destiny, Iscar, Kennametal, Mitsubishi Materials, PHorn, Raptor, WIDIA are all available
- Over 192,000 products and 234,000 3D models available. 29,867 product changes and 16,632 updated 3D models
- 24,000 new products in the Mitsubishi Materials catalog for a total of 39,000 available, making the catalog 86% complete
- Mitsubishi Materials catalog includes a toggle switch between inch and metric items
- User Interface revamped:
 - Theme updated with new colors and icons
 - Buttons moved to the top for more intuitive usability
 - Assembly names in bold for better readability
- Sign-in dialog retains the last email ID used during login
- Email address can be modified in the user account
- Availability can be checked for up to five items concurrently
- Availability can be checked from the job's "tool list" and from *MyTools*
