

v2.8 Release Now Available

The latest release of the MachiningCloud App is now available from www.machiningcloud.com/get-started.

Seco Tools is now available on MachiningCloud!

Over 10,000 tool items including indexable milling and tooling systems can be accessed by Seco customers. Solid carbide, holemaking, and turning tool items will be continually updated in upcoming releases.

The Seco MachiningCloud partnership offers an additional channel for machine shops to access Seco's high-performance products and support services. MachiningCloud users have access to Seco product data while in the simulation phase, and have the possibility to connect machines in production to the tool library.

Utilizing the convenience of cloud-based technology, customers can optimize the way they gather information for their manufacturing operations by effortlessly searching for the proper cutting tool that best fits their cutting conditions without having to search through catalogs or multiple websites.

SECO 

Tungaloy is now available on MachiningCloud!

Over 20,000 Tungaloy tool items are now available. Tungaloy, a member of the IMC Group, is a manufacturer of a diverse range of products, including metal cutting tools, such as indexable inserts and steel products.

The Tungaloy MachiningCloud partnership utilizes the convenience of cloud-based technology, which enables customers to optimize the way they gather information for their manufacturing operations by effortlessly searching for the proper cutting tool that best fits their cutting conditions without having to search through catalogs or multiple websites. Tungaloy customers will save a tremendous amount of time and experience improved results by working with up-to-date knowledge and data.

Colibri is now available on MachiningCloud!

Colibri spindles are now available on MachiningCloud. Colibri's exclusive high-speed spindle technology has a proven impact on their customer's profitability.

Utilizing both coolant power and high speed, their spindles greatly enhance performance by significantly cutting down on machining time and improving surface quality and extending tool life.

GARR TOOL is now available on MachiningCloud!

Over 10,500 GARR TOOL items are available on MachiningCloud — solid tools including drills, end mills, and reamers.

GARR TOOL manufactures high performance solid carbide-cutting tools in a 200,000 sq. ft. facility located in Michigan. GARR TOOL also has a U.K. facility to service its European customers.

Tap Associates is now available on MachiningCloud!

Tap Associates provides self-locking tap extensions for machine and pipe taps. The company is showcasing their unique product line of self-locking "Jungere" Tap Extensions, which is now available on MachiningCloud.

New and Improved in v2.8:

- Cutting Tool Brands now available include: Allen Benjamin, Colibri, Command, Dapra, Destiny Tool, GARR TOOL, G.W. Schultz, IMCO, Ingersoll, Iscar, Kennametal, KOMET GROUP, MAFord, Mitsubishi Materials, North American Tool, PHorn, Raptor, Redline, RobbJack, Seco Tools, TaeguTec, Tap Associates, Tungaloy, WIDIA, and WNT
- Over 584,315 products and 442,482 3D models available. 53,131 product changes and 95,946 updated 3D models
- Assemblies can be made with items from different brands. Two modes are available:
 - **Free-form mode OFF:** Filtering the catalogs using the manufacturer's connection codes
 - **Free-form mode ON:** No filtering
- Images are displayed in full size on the product page when available
- When switching languages, a warning message shows the current and next language
- New software partners can be requested from the Job Export Dialog
- More improvements in v2.8 - [for a complete list, click here](#)

MachiningCloud will be at the following 2018 conferences:

- | | |
|---|---|
| ■ Industrial Supply Assn (ISA) April 14-16, 2018 Baltimore, MD Booth #848 | ■ IMTS September 10-15, 2018 Chicago, IL |
| ■ USCTI Spring Conference May 19-21, 2018 Santa Fe, NM | ■ Top Shops Conference (Modern Machine Shop) September 13, 2018 Chicago, IL |
| ■ ESPRIT World June 11-15, 2018 Indianapolis, IN | |

 **A note of gratitude...**

If you do not see your preferred cutting tool brand in our library, we encourage you to contact your tool supplier and request they publish their data on MachiningCloud.

MachiningCloud is dedicated to leading a digital shift within the discrete manufacturing industry to deliver a new level of operational efficiency. Cloud-based applications, resources, services, and knowledge & digital product data from the world's leading manufacturers of cutting tools, machine tools, workholding and specialty products are providing efficiency improvements by facilitating the flow of data to and from today's data intensive shop floor, software, and equipment.

Thanks to our supporters who share our vision.
