

v3.0 Release Now Available

The latest release of the MachiningCloud App is now available from www.machiningcloud.com/get-started.

Denitool product data for turning tools is now available on MachiningCloud. Denitool Precision Tools is a manufacturer of a wide range of high performance cutting tools and inserts for turning and milling, with a distribution network in North America and internationally.

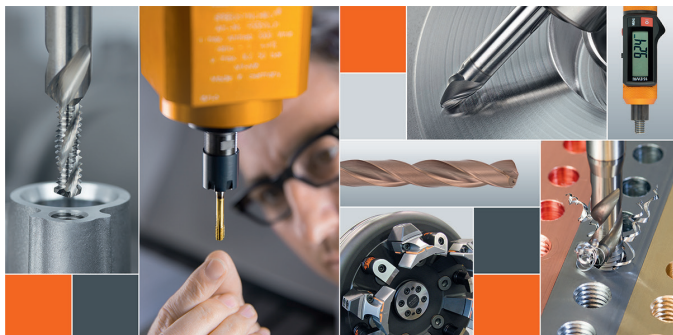

Mitsubishi Hitachi Tool Engineering's new brand "Moldino" (Mold+Die+Innovation) product data for milling tools is now available on MachiningCloud. Mitsubishi Hitachi Tool Engineering is a manufacturer of endmills, indexable tools, drills, and threading tools amongst others.

Over 40,000 Walter tool items can be accessed by customers on MachiningCloud.

As a provider of specialized machining solutions, Walter offers a wide range of precision tools for milling, turning, drilling and threading applications.

Over 14,500 Emuge solid tool items are now available on MachiningCloud. Emuge customers can find milling, drilling, threading, and tapping product data on the cloud.

Over 14,000 OSG tool items for milling, drilling, and threading are now available on MachiningCloud. OSG manufactures taps, end mills, drills, and indexable cutting tools.

New Inventory Feature

MachiningCloud's newest features will help you easily and quickly build assemblies with items available on your shop floor, helping you with everyday tasks. It will also allow you to manage and maintain quantities of each item in your inventory.

New and Improved in v3.0

- Cutting Tool Brands now available include: Allen Benjamin, Allied Machine & Engineering, Colibri, Command, Dapra, Denitool, Destiny Tool, Emuge, GARR TOOL, G.W. Schultz, IMCO, Ingersoll, Iscar, Jergens, Kennametal, KOMET GROUP, Kyocera SGS Precision Tools, LMT Onsrud, MAFord, Mitsubishi Hitachi Tool Engineering, Mitsubishi Materials, North American Tool, OSG, PHorn, Raptor, Redline, RobbJack, Seco Tools, TaeguTec, Tap Associates, Tungaloy, Walter, WIDIA, and WNT
- Over 728,982 products and 567,778 3D models available. 89,354 product changes and 168,759 updated 3D models
- Enhanced Feeds & Speeds to allow calculation and more results for multi-brand assemblies
- Optimized Edit Projection Length logic
- Improved 3D viewer, specifically turning tools are displayed with the insert facing camera
- Added "Author" and "Last Modified By" columns to the grid in MyTools and MyWorkholdings
- Active Job is now indicated with a briefcase icon
- Enhanced "Send Copy To" function
- More improvements in v3.0 - [for a complete list, click here](#)

MachiningCloud's **Community** website is here!

Join the MachiningCloud Community by visiting our website and participating in forums. You could visit <https://community.machiningcloud.com/> or go through our main website and click on [Community](#) from the top navigation. In order to participate in forums, you will need to log in with your same credentials that you use for the MachiningCloud App.

How to upload your photo in the App

If you would like to upload your photo within the App, go to "My Account" while in the App. It is the person icon on the upper right corner. Uploading your photo will enable your photo to show up in our Community website posts.

5 Common Cutting Tool Problems and Solutions

Manufacturing has become a computerized industry.

That means it's never been easier for CAD/CAM Programmers and Manufacturing Engineers to get more done in less time.

Let's say a new job falls into your lap.

And the material requirements and specs differ from your normal orders, you:

- ☒ Open a catalog,
- ☒ Call your tool rep,
- ☒ Open the MachiningCloud app and search for tools by material.

You can use MachiningCloud for a variety of common shop floor problems.

Simulating a job with different software is probably a good idea, so you can check for collisions too. Consider tool changes and removal rate efficiency before there's an issue, so you have to load the job into your CAM software to make those changes before handing it off.

In case you missed these important announcements...

Over 6,000 of Allied Machine's holemaking products can now be found on the cloud. Included are the GEN3SYS, T-A, and Structural T-A replaceable insert drilling product lines.

Jergens' customers can find over 6,500 workholding products on MachiningCloud. Jergens manufactures standard tooling components, vises and other workholding equipment.

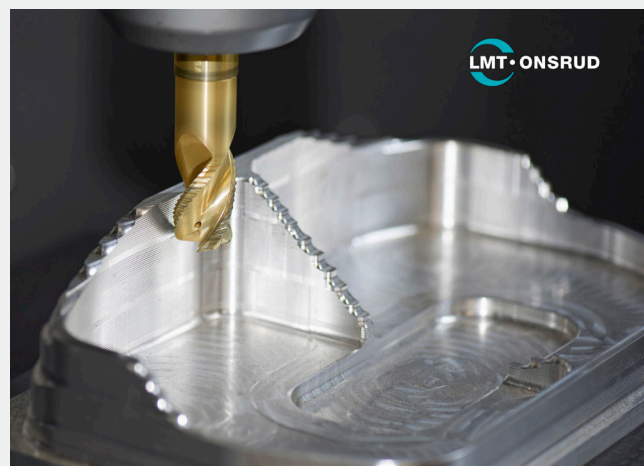

Building Multi-Brand Assemblies

One of MachiningCloud's newest features enables you to build assemblies with items from multiple brands.
